

DATA SHEET NO. 3300-915

BEESWAX FINISH/COUNTERTOP WAX

DESCRIPTION

BEESWAX FINISH/COUNTERTOP WAX is a natural beeswax-based compound, which is used as a surface treatment for porous concrete surfaces to reduce moisture and stain penetration. The product can be used for both interior and exterior applications.

USE

BEESWAX FINISH/COUNTERTOP WAX is used as a treatment to provide limited water and oil repellency and to resist stain migration. BEESWAX FINISH/COUNTERTOP WAX may be polished to provide a glossy finish.

Suitable for use on concrete kitchen, bar, and bathroom countertops. BEESWAX FINISH/COUNTERTOP WAX can also be used on various concrete vessels, bowls, and tables.

Packaging

200 gm
2 Kg

Characteristics

Appearance: Light yellow to white.

Limitations

BEESWAX FINISH/COUNTERTOP WAX must be applied to a clean and cured surface.

Preparatory Work

All surfaces must be clean, dry, and free of all contaminants such as oil, grease, dirt, and curing compounds. Remove any oil, grease or other substances with ULTRITE® DEGREASER from W. R. MEADOWS. Do not wash or etch with acid. If applying over an acid-stained finish, acid neutralization must be complete. If dry dust is present, remove by vacuum cleaner.

Precautions

Do not ingest. Use as directed.

Installation Instructions

- BEESWAX FINISH/COUNTERTOP WAX is best applied by heating up the concrete surface and rubbing material into the surface with a clean cotton cloth.
- Highly porous concrete substrates may require two or more coats.
- A high gloss can be achieved by hand-rubbing warm wax with a clean, soft cotton cloth or mechanically buffing warm wax with a lamb's wool polisher.
